

Calculation

Function of the component: You want to perform a calculation with sensors, counters or memories, then you need to consider following:

- Go to „Controls“ in „Device configuration“. Create a new control function with the green plus
- Press the button „Functions“.
- Create the „calculation“ function component.
- Enter a name e.g.: „Temperature“.
- Enter at Max: e.g. 500.
- At „Type“ select the value you want to output z.B.: °C.
- At „Formula“ select the value you want to calculate.
- At „New“ you can work with sensors, counter, memories. You can set fixed numbers, add up values, subtract, multiply and divide.
- At „Interface“ „DO_Virtual“ is always available.
- Confirm two times with „OK“ and create a switch with the green plus.

Rechnen mit Zählern/Sensoren
